New Product: Pumping Trap GLP81

Pumping Trap: New Product Type GLP81

Pumping trap for the recovery of large condensate amounts.

- As there is no electricity needed to return the condensate, the pump ing trap can be used at intrinsically safe places.

- The pumping trap will work with a low filling head of only 150 mm.

- Air or saturated steam can be used as motive medium.

- The internal parts are manufactured of high quality stainless steel.
